

DERIK NDLOVU

My name is Derik Ndlovu. I am currently studying for a Masters degree in Criminology. I believe in this University and that is the main reason why I am standing for the position of **Sabbatical Officer- FSSH**. Below are some of the reasons why you should vote for me.

Manifesto: I want to contribute to the welfare of students in our University, make the students union more student-centric, open and closer to every student irrespective of race, gender, and religion. I will also make the student union a hub of ideas where students will be free to contribute their opinions in relation to what happens inside and outside of the student union.

I will also encourage exchange of ideas between students, the academia and other stakeholders to ensure that our graduates are better trained and equipped to compete favourably with others in the job market. I intend to work hard to encourage the involvement of corporate bodies through seminars, conferences, internships so that our future graduates will leave the University with adequate job related skills.

I shall also work hard to provide more guidance/support to vulnerable students who may be experiencing personal, professional or academic related difficulties. I believe that every student of this university has a capability to do better and my role will be to encourage every student to work harder so they can leave the University with good degrees and get better jobs.
