"ALL FOR ONE AND ONE FOR ALL"

Solidarity is the key towards equality a place where everyone joins hand in hand *TOGETHER*, a place where multiculturalism is on the rise globally and internationally, *EDUCATION* is fundamentally important *Internationally economically and environmentally* ,in the effect governments around the world are seen as equally coming together to make certain changes in our developing world a place for human dignity and love for the existence of this world

From my experiences people do struggle from a day to day basis in our life experiences, in certain parts of our world, strategic sustainability is very import fundamentally, as seen today people do try save their lives on an everyday basis, in terms of working looking after children paying taxes etc. based on policy changes rules and regulations set about by our policy- makers elected members of government in our society.

As an International Relations Student and also a Star representative at The London Metropolitan University my experiences are evident, Sitting as a member of our university as a Council Member would enable my presence of promoting equality within our educational provisions set about at London Metropolitan, promoting awareness in terms of our excellent customer services that are provided, our expertise, in our food, our health, and environment, whether it may be political or governmental we all understand we all are different and all share different values.

I would like to be part of this successful team as a Council Member, I fully understand the fundamentals and principles of our University and I would like to be that voice that speaks up for the unrepresented at out university, and that is what my motto says to be able to speak and represent for my "Student Family" while I'm here at London Metropolitan "All for one and One for ALL.
